

WIFI

Communication module

Technical Parameter

Basic Parameter	
Input voltage	5V
Power	2W
Size (length * width * thickness)	71.5mm*65mm*39.5mm
Operating temperature range°C	-25 ~ 60
Operating humidity	5 ~ 95% RH (Non-condensing water)
Operating altitude	<4000m
Water Protection	IP65

Software parameter	
Configuration	APP/WEB
Operating mode	AP/STA/AP+STA
Wireless standard	802.11 b/g/n
Frequency Range	2.412GHz-2.484GHz
Certification	FCC/CE/RoHS

Features

- Use WiFi monitoring, no wiring and 2G data traffic
- Support encryption to ensure data security
- Support breakpoint retransmission, automatic disconnection of communication broken links, reconnection and subsequent transmission to ensure data is not lost
- Support remote upgrade, you can upgrade the inverter program without visiting the site
- As the whole machine is assembled, tested and shipped, no on-site installation is required, and stable performance.
